DETAILED ACTION

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Drawings

Applicant should ensure that (1) all reference characters in the drawings are described in the detailed description portion of the specification and (2) all reference characters mentioned in the specification are included in the appropriate drawing Figure(s) as required by 37 CFR 1.84(p)(5).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, for example, there is no antecedent basis for "the fried foods" (line 9), "the excess oil" (line 12), etc. Clarification is requested.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4 and 5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Koff (US 5,054,209). Koff discloses a vessel for separating and collecting excess oil from deep fried foods disposed therein before the deep fried foods are sauted, said vessel comprising: a) a pot (15); b) a colander (13); c) a motor (19); and d) a gear train (23,24); wherein said colander is rotatably mounted in said pot; wherein said colander is for holding the fried foods; wherein said motor is operatively connected to said colander; wherein said motor rotates said colander relative to said pot; wherein said motor is for centrifugally forcing the excess oil from the deep fried foods out therefrom and collecting in the pot; and wherein said gear train operatively connects said motor to said colander, wherein said pot has a bottom; wherein said pot has a bearing (16); wherein said bearing of said pot extends centrally from said bottom of said pot; and wherein said bearing (16) of said pot extends upwardly from said bottom of said pot, wherein said colander (13) has a bottom; wherein said bearing (16) of said pot (15) extends centrally to said bottom of said colander (13) so as to form an axis of rotation; and wherein said axis of rotation is about which said colander rotates in said pot (15). Thus, the features of the instantly rejected claims are structurally met by the reference.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 3, 6 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koff (US 5,054,209) in view of Lin (US 6,439,421). The patent to Koff discloses the claimed subject matter except for a handle; and wherein said handle is replaceably attached to said pot. The patent to Lin discloses that it is known in the art to have a handle (1); and wherein said handle (1) is replaceably attached to said pot (6). Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided pot of Koff with a handle replaceably attached in the manner suggested by Lin in order to remove the handle from the pot when desirable. Regarding claim 6, note the gear train of Koff has drive gear (23) and driven gear (24). Regarding claim 9, note handle (1) of Lin is hollow (11).

Allowable Subject Matter

Claims 7, 8 and 10-23 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents are cited for further teachings of devices whose structure is similar to that instantly disclosed.
